June 1, 2022

Dear HL7 Member,

The Structured Documents Work Group has published a new errata version of the **HL7 Clinical Document Architecture, Release 2.1** standard. It contains a correction to the currently published errata publication titled, "**HL7 Clinical Document Architecture, Release 2.1 2021JANerrata**".

A new errata package has been published for this specification to correct omissions in the Readme file and to remove duplicate Readme.md files previously included in the publication package. The new \_Readme.txt file has been placed in the root folder of the download package and its instructions correctly clarify the purpose and location of the full set of files in the publication package.

This errata release is named **HL7 Clinical Document Architecture, Release 2.1 2022JUNerrata**. The referenced standard and download package can be found on the HL7 website using the following URL:  
[https://www.hl7.org/implement/standards/product\\_brief.cfm?product\\_id=515](https://www.hl7.org/implement/standards/product_brief.cfm?product_id=515)

Sincerely,

A handwritten signature in black ink, consisting of a stylized 'D' followed by a long, sweeping horizontal line that ends in a small upward flick.

Daniel Vreeman  
HL7 CSDO
